DETAILED ACTION

Allowable Subject Matter

Claims 15-27 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Consider independent claims 15 and 27, the best prior arts of record found during the examination of the present application are: **Fukuda et al. (USPN 2003/0040346)** and **Sladen et al. (USPN 2002/0061767)**.

In view of the present invention as claimed, Fukuda discloses mobile terminal with a camera. The camera is comprised in one housing and the optical system is comprised in the other housing.

Compared to the present invention as claimed, Fukuda does not disclose a portable terminal further comprising a second refractive conversion lens, and means for replacing said first refractive conversion lens with said second refractive conversion lens, wherein said first and second refractive conversion lenses are mounted on a holder in the other of the first housing and the second housing, and wherein said second refractive conversion lens is exchangeable with said first refractive conversion lens by a sliding operation of said holder and further wherein said first and second refractive conversion lenses are mounted on a rotatable turret, and said second refractive conversion lens is exchangeable with said first refractive conversion lens by a rotation operation.

In view of the present invention as claimed, Sladen discloses a mobile terminal with a camera having sliding mirrors as part of the optical system, where the mirrors can

Art Unit: 2618

be exchanged from one to another in order to change the focal point or the view of the camera.

Compared to the present invention as claimed, Sladen fails to disclose a portable terminal further comprising a second refractive conversion lens, and means for replacing said first refractive conversion lens with said second refractive conversion lens, wherein said first and second refractive conversion lenses are mounted on a holder in the other of the first housing and the second housing, and wherein said second refractive conversion lens is exchangeable with said first refractive conversion lens by a sliding operation of said holder and further wherein said first and second refractive conversion lenses are mounted on a rotatable turret, and said second refractive conversion lens is exchangeable with said first refractive conversion lens by a rotation operation.

In light of the combination of the above cited references, the present invention is novel and non-obvious since the prior arts of record do not contain either explicitly or implicitly the limitations as a whole as disclosed in claims 15 and 27. In addition, any reasonable combination of the cited references cannot be used to reconstruct the claimed invention. Therefore, the present invention as claimed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
